•PP board, was replaced with **Thermopad™**.
This gave strength and improved microclimate properties, including thermal insulation and ventilation underneath mattress.

- **Roof air ventilation** has been enlarged. Roof air ventilation is opened by bending the material, this allows to easily change the size of the opening.
- Added **bottom air vent**, to increase ventilation

·**Fabrics** under mattress was replaced with the mesh to expose Thermopad™ and increase air flow.

·**Canopy roof** ajuster replacement.
This allows you to adjust the position
of the roof with one button.

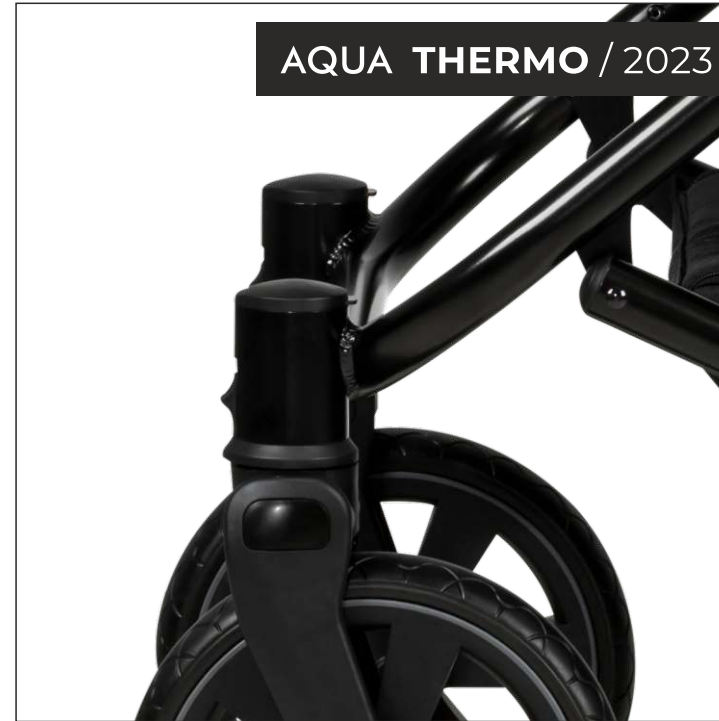

·Carrycot **adapters** was reinforced to prevent wobbliness.

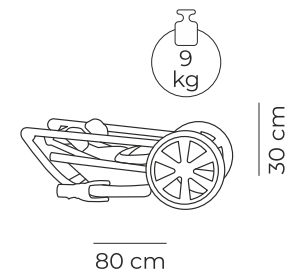

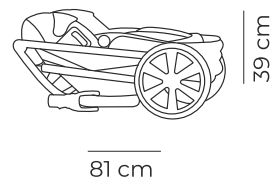

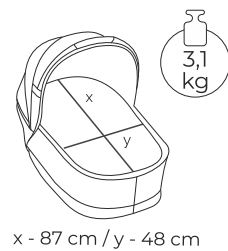

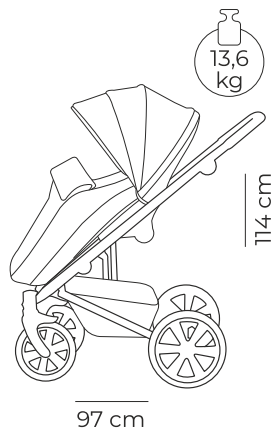

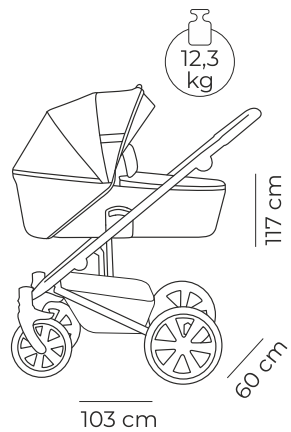

·**Seat cushion** has been updated to increase comfort and support.

·**Handle of the frame** is raised to increase the comfort of the user.

·**Front forks** have been changed to increase stability on incline slope

Box measurements 89x53x55 cm
Box capacity 0,284 m³
Netto weight 17,55 kg
Brutto weight 19,75 kg
